

LITERATURE CITED

This is a consolidated list of all works cited in volume 2, whether as selected references, in text, or in nomenclatural contexts. In citations of articles, both here and in the taxonomic treatments, and also in nomenclatural citations, the titles of serials are rendered in the abbreviated forms recommended in G. D. R. Bridson and E. R. Smith (1991). Cross references to the corresponding full serial titles are interpolated here alphabetically by abbreviated form. In nomenclatural citations (only), book titles are rendered in the abbreviated forms recommended in F. A. Stafleu and R. S. Cowan (1976–1988) and F. A. Stafleu and E. A. Mennega (1992), which are indicated parenthetically following the full citations of those works here. Cross references to the full citations are also interpolated in the list alphabetically by abbreviated form. Two or more works published in the same year by the same author or group of coauthors will be distinguished uniquely and consistently throughout all volumes of *Flora of North America* by lower-case letters (b, c, d, ...) suffixed to the date for the second and subsequent works in the set. The suffixes are assigned in order of editorial encounter, and do not reflect actual chronological sequence of publication. The first work by any particular author or group from any given year carries the implicit date suffix "a"; thus, the sequence of explicit suffixes begins with "b". In three cases, this list includes citations with dates suffixed "b" that are not preceded by citations of "a" works (i.e., ones with no date suffix) for the same year. This does not reflect omissions here but rather that there are corresponding "a" works cited (and encountered first from) elsewhere in the *Flora* that are not pertinent here.
